Personal Projects

Yelpcamp | 🌐 [Website](#)

- Pioneered a dynamic platform where users actively engage with campgrounds, fostering a vibrant and interactive community.
- Implemented robust functionalities, empowering users to seamlessly post, modify, and manage reviews and comments on campgrounds
- Engineered an optimized MongoDB infrastructure, ensuring efficient storage and retrieval of critical user data, including reviews, campgrounds, and more.

Portfolio website | 🌐 [Website](#)

- Designed curated sections that impeccably illustrate my professional journey, education, and noteworthy activities.
- Demonstrated expertise in minimalist design principles, delivering a visually stunning and engaging user experience.
- Showcased my technical skills in HTML/CSS, JavaScript, and responsive design, reflecting a strong foundation for the developer role.

Rock Paper Scissors Game | 🌐 [Website](#)

- Implemented game rules and logic to determine the winner based on the chosen options, providing an authentic gaming experience.
- Employed event handling and DOM manipulation in JavaScript to update game status, scores, and dynamically display results.
- Implemented JavaScript logic to enable player interaction, allowing them to choose between Rock, Paper, or Scissors.

To-do list App | 🌐 [Website](#)

- Designed a clean and intuitive user interface using HTML and CSS, providing a visually appealing and user-friendly experience.
- Leveraged JavaScript to implement interactive functionality, allowing users to add, edit, and remove tasks with ease.
